POLYFLEX® TRANSPARENT POWDER COATINGS

Powder Coatings
kabe-farben.ch

KARL BUBENHOFER AG

POLYFLEX® transparent powder coatings have been specially developed as protective coatings for surfaces that have already been painted or coated.

POLYFLEX® transparent powder coatings make the perfect top coat. They are highly resistant to scratching and impacts and have good mechanical properties. These transparent powder coatings are ideal for metal substrates both inside and outside. They provide excellent protection against corrosion and weather conditions.

**SHINE EFFECTS
WITH
TRANSPARENT
POWDER COATING**

**DECORATIVE
PROPERTIES**
Special optical surface effects
can be achieved on
steel or aluminium.

**EASY
APPLICATION**
The application can be made
with all common
powder coating systems.

TRANSPARENT POWDER COATINGS FOR **INDOORS** (colorless shade no. 1M8217)

Art. Nr. 12517, POLYFLEX® **PES-125** transparent smooth Corona silk gloss 55

Powder for outdoor use based on polyester resins. Gives transparent silk gloss surfaces with very good flow and good light and weather resistance. Stabilized against overcuring and discoloration in directly gas fired ovens.

Art. Nr. 14857, POLYFLEX® **PES-96** transparent smooth Corona silk matt

Powder for indoor use based on polyester resins. Gives transparent silk matt surfaces with good flow. Stabilized against overcuring and discoloration in directly gas fired ovens.

Art. Nr. 14882, POLYFLEX® **PES-96-NT** transparent smooth Corona gloss

Low bake powder for indoor use based on polyester resins. Gives transparent glossy surfaces with good flow. Stabilized against overcuring and discoloration in directly gas fired ovens.

TRANSPARENT POWDER COATINGS FOR **EXTERIOR USE** (colorless shade no. 1M8217)

Art. Nr. 11981, POLYFLEX® **PES-125** transparent smooth Tribo/Corona gloss 90

Powder for outdoor use based on polyester resins. Gives transparent glossy surfaces with very good flow and good light and weather resistance. Stabilized against overcuring and discoloration in directly gas fired ovens.

Art. Nr. 13877, POLYFLEX® **PUR-125** transparent smooth antiraffiti Corona silk matt

Powder for outdoor use based on polyurethane. Gives transparent silk matt surfaces with good flow and very good light and weather resistance. The coatings exhibit a high crosslinking density resulting in exceptional solvent resistance. This feature allows the removal of so called „graffiti“ with appropriate products without damaging the coating. Stabilized against overcuring and discoloration in directly gas fired ovens.

Art. Nr. 14208, PPOLYFLEX® **PAC-140-SD** transparent smooth Corona matt

Superdurable powder for outdoor use based on polyester resins. Gives transparent matt surfaces with good flow and excellent light and weather resistance. Stabilized against overcuring and discoloration in directly gas fired ovens.
