

KABE training

Hints, tips and plenty of background knowledge – our courses offer all the latest information.

You can benefit from the expertise of our specialists in a variety of different training modules. We hold courses on individual subjects and also help you to run workshops. All of this training can take place on our premises or on yours. We can also customise the content of our courses to meet your individual requirements.

An overview of what we have to offer:

Service	Description
Colorimetry, the theory of colours and the KABE FARBwerk (a tool for specialists in colour)	A course on the science and theory of colours
Product training	Training on the KABE product ranges with information about application options
KABE basic customer training	Everything you need to process powder coatings correctly: the manufacturing process, raw materials, application, curing
KABE advanced customer training	Application training on customers' premises, designed specifically for customers' application systems and products
Testing/quality assurance	High-tech mechanical testing
Coating faults and their causes	Training on coating problems, their causes and how to rectify them. Practical examples of faults.

If you have questions, please contact us. Together we can find the right solution for you.
