

TECHNICAL DATA SHEET

P-0570 DBS 918 340

Article No.: 12827	POLYFLEX® PES	5-135-C	fine stru	ıcture Tribo/Corona		
Version: 8	silk matt					
Description:	Powder for outdoor use based on polyester resins. Gives silk matt surfaces with fine structure and excellent light and weather resistance. Stabilized against overcuring and discolouration in directly gas fired ovens.					
Applications:	Aluminium profile, sun protection systems, Garden furniture, shutters, noise walls, windows, doors, gates and frames and much more					
Colours:	Almost any colour with few limitations					
Surface:	Fine structure					
Gloss:	Visually silkmatt					
Powder properties:	Particle size distribution (HELOS H1708)	29 μm: 122 μm:	38 - 48 % 98 - 100 %			
	Density	1.4 – 1.8 g/cm³ can vary depending on the colour; can be specified for each individual colour				
Material consumption:	g/m²	= density (g/cm³) x film thickness (μm)				
Coating thickness: Application:	Recommended	70 – 90 depending on the colour tone				
	Maximum	120 μm				
	processing instructions for t and not to change the prop other powder coatings.	extured pow	der coatings VR00	o the substrate. Please observe our 01D. In order to avoid surface defects king this type of powder coating with		
Packaging:	- 20/25 kg cardboard box					
	- 500 kg Octobox					
	- 450/500 kg Big Bag					
	0 0 0

	Mandrel bending test (DIN ISO 1519)	1) ≤ 5 mm				
	Impact resistance (ASTM D 2794)	1) front	≥ 5 Nm	(~44 Inchpound)		
		1) reverse	≥ 2.5 Nm	(~22 Inchpound)		
	Erichsen cupping (DIN ISO 1520)					
Resistance:	Tested on: Aluminium panel 0.8 mm AIMg1 H14 chromated					
	Condensation water test (DIN ISO 6270)	1000 h no blistering Infiltration on the scratch track under 1 mm				
	Salt spray test (DIN ISO 9227	1000 h no blistering Infiltration on the scratch track under 1 mm				
Material Approvals:						
	Qualicoat	P-0570				
	DB	Product qualification of Deutsche Bahn according do DBS 918 340				
Repairs:	For repairs (conveyors hangers touch ups) the repair kit, art. No 10006124 is available.					
Post treatment of coated parts:	Appropriate preliminary tests are recommended for printing, gluing, labeling, film lamination, overcoating and other post treatments. Suitable plasticizer free materials are to be used for the packaging. Avoid condensation.					
Storage:	Storage instruction:	In the original containers, store in a cool and dry environment at max. 25 °C. No direct sun exposure.				
	Shelf life:	24 months from the date of production under the mentioned conditions.				
Safety recommendations:	Lower explosive limit	Please refer to the safety data sheet.				
	Further information can be found in the safety data sheet and the CEPE brochures "safe powder coating guideline" and "results of the experimental toxicological studies on thermosetting powdercoatings".					
Comments:	The information in this technical data sheet relative to the properties and application of the product concerned are made on hand of our knowledge, development and practical experience. Because of the multiple possible applications, it is impossible for us to present them all in detail. Our technical consultants are at your disposal for any question you might have. Furthermore, our general sales and delivery conditions apply. This technical data sheet is revised periodically. If necessary, our sales department will confirm the validity of this document.
